

ARI

Associazione Radioamatori Italiani

3rd A.R.I. Italian EME Trophy – 2017

Rules

Spring Session: from 00.00 UTC of **May 27th** to 24.00 UTC of **May 28th 2017**

Autumn Session: from 00.00 UTC of **September 16th** to 24.00 UTC of **September 17th 2017**

Bands: 144 MHz – 432 MHz - 1.2 GHz - 2.3 GHz - 5.7 GHz - 10 GHz - Separate classification for each band.

Modes:

Analog Modes : CW - SSB

Digital Modes : JT65B et similia

Only via Moon Reflection (EME)

It's possible to work the same station once for each mode Analog or Digital with a maximum of 2 QSOs during the same session : (1 QSO in CW or SSB and 1 QSO in Digital Modes)

Categories for bands:

Stations are subdivided by type of antenna used.

For Yagi antennas the total length (distance reflector-last director), in wavelengths, is taken in account multiplied by the number of yagis in the antenna array.

In case of H/V or Circular polarization Yagi antennas system we will take in account only the longest one.

For the parabolic dishes we take in account the diameter's length.

Mix Mode (Digi & CW/SSB)

Category: 144 MHz. 1 wl = 2,08 m = 82" = 6' 10"

Cat.	Yagi
A-mix	< 4 wl
B-mix	< 9 wl
C-mix	< 13.5 wl
D-mix	<20 wl
E-mix	>20 wl

Single Category : 432 MHz

Category: 1.2 - 2.3 - 5.7 - 10 GHz.

Cat.	Dish
A-mix	< 3m (10') & Yagi
B-mix	< 6.1m (20')
C-mix	> 6.1m (20')

Analog Modes (CW/SSB)

Single Category : 144 MHz CW/SSB

Single Category : 432 MHz CW/SSB

Category: 1.2 - 2.3 - 5.7 - 10 GHz CW/SSB

Cat.	Dish
A	< 3m (10') & Yagi
B	< 6.1m (20')
C	> 6.1m (20')

Multiband

Every station, that will send their logs in at least 2 bands from 1.2 GHz till 10 GHz regardless of the category and score, will be put into a Multiband Classification. Every score will be weighted following the bottom table and then added together.

1,2 GHz	x 1
2,3 GHz	x 3
5,7 GHz	x 5
10 GHz	x 7

The score calculation for the Multiband category will be made exclusively by the contest manager.

Downgrading:

If the first of each category scores less than the first of the lower category, the whole category is moved into the lower.

QSO Points:

20 points for each CW/SSB QSO
3 points for each Digital QSO

Multipliers:

Every Italian station worked counts as **multiplier x 2**.
If you work the same Italian station on both modes (analog and digital) the multipliers are two (x4).
(If there are no Italian stations in the log the sum of points will be the Final Total Score)

Total Score:

Total Score = Total of QSO points * Total of Multipliers

For example :

*[5 QSO CW (100 pts) + 25 QSO DIG (75 pts)] * [3 Italian stations wkd (6 mults)] = 175*6= 1050 points*

For a log without Italian stations worked :

[5 QSO CW (100 pts) + 25 QSO DIG (75 pts)] = 175 points

Prizes:

For each session to the First Station of each category.
A certificate will go to all participants who sent the log.
If someone wins more than one category, he gets only one prize and certificates for the other categories won, while the prize for these categories goes to the second placed in the classification, except for the Category Multiband.

Trophy Score:

All Stations that have participated in both sessions (Spring + Autumn) in the same band will participate to the Final ARI EME Trophy.
The Trophy's score will be the sum of the scores obtained in every session.
The First Station in each category will receive a Prize; all the participants will receive a certificate.

Log entries:

Contest entries must be sent **within fourth Monday after the contest** only via e-mail to :

i5wbe@i5wbe.it

The log must contain a general section with: Call used, Name, Address (including e-mail), QTH Locator, Band, Category, Power, Antenna type and dimensions in wavelenght.

Each QSO line in the log must contain Date, Time (UTC), Call, QSO Points, Multipliers per band of participation. At the end of the log must be indicated Total QSO Points, Total Multipliers, Total Score Declared

It is preferred excel format logs (xls or xlsx) like the facsimile available at the following link :

<http://www.eme2008.org/ari-eme/contest.html>

Pse avoid: pdf, jpg or similar format, TNX

Comments about conditions and pictures are welcome.

Notes:

It's allowed to indicate own cq frequency on chats and EME Logger.

Every station that during the contest will exchange information about the QSO through these chat or logger will be considered as Check Log. **Only Call and CQ frequencies are allowed.**

The final judging of the entries are responsibility of the contest manager, whose decision is final. Entrants deliberately contravening any of these rules, attempting fraud or flagrantly disregarding the IARU band plans will be disqualified.
